Update on the FCC Methodology Consultation

- **Key Themes:**

- The key themes, in no particular order, are as follows:
- Generally, the use of the historical flows as a basis for the FCC Methodology is an improvement on existing FCC Methodology which is in place currently.
- Support for the use of the key principles within the calculation of the FCC Methodology.
- Appreciation of the engagement process and transparency that has been followed for this review of the FCC methodology and to continue with the same engagement process with the same levels of transparency would be welcomed in other FCC Methodology reviews.
- Ensure monitoring continues to provide reporting and transparency on performance and ensure continual improvements can be accommodated into subsequent FCC Methodology updates
