

GB Remit

(This slide has been updated post the forum presentation- changes are reflected in blue)

- Project Description
 - National Grid currently offers a non-obligated service to the industry via which they can choose to meet their obligations under REMIT to publish UMMs.
 - There is now additional REMIT obligations that came into force from Jul 2016, requiring service providers to provide web feeds of the data to ACER in an XML format.
 - National Grid has taken the decision to continue this service to provide the industry a conduit to publish Inside Information (UMM). This will have Business Hours cover only.
- Change Driver: REMIT regulations
- Implementation Date: 1st January 2017. (However will go live around mid December)
- Operational Impacts to Industry:
 - A new xml structure for reporting urgent market messages via GB remit website
- Industry Activities Envisaged:
 - Support required from a few key users to test the xml structure (October/November)
- Engagement Approach for Operational Elements:
 - Gas Ops Forum
 - Key communications via NG website
