Impact on Allowed Revenue within RIIO-1
This table shows the impact on allowed revenue in the relevant year - with actuals (subject to determination) and forecasts thereafter.

The cells above the allowed revenue indicate the year of performance

Cost of Debt Allowance

The latest published PCFM contains the allowed cost of debt rate (%) for the reporting year.

However, the RAV does not account for the reporting year actual expenditure and additional allowances.

Consequently the return element of revenue does not currently reflect the monetary allowance. This is updated and available in the forthcoming annual iteration process.

To address this timing issue, network operators should forecast the allowance in row 79 (linked to R9-RAV table) - which will be trued-up over time.
