

European Implementation Programme - System Developments Update

November 2015

Overview of EU2016 Requirements

- Publication of more data to the EU Transparency Platform - PDWS:
 - Hourly Physical Flows at the Interconnector Points
 - 10 years of data for Capacity at all locations
- Maintaining data publication on MIPI (& Instantaneous Flow pages) in GB reference condition units - Bacton Interconnectors are changing to supply data in EU reference condition units

Timelines for Delivery

- Main implementation date will be in April 2016, ahead of Interoperability and Transparency Compliance deadlines of 1st May 2016
- Physical Flow publication may be implemented earlier; analysis is underway to determine if this is feasible
